Private Insurance Coverage

Many private insurance companies will cover consultations, lab tests, treatments or supplements provided by our doctors.

We are able to direct bill more than 80% of the insurance companies providing coverage. Please bring your insurance card to your appointment and we will determine whether we can bill your insurance provider directly.

Please note that each insurance company's policy is different and will have varying levels of coverage as well as method of payment. Some providers will pay us directly, others will reimburse the policy holder directly. Payment method is dictated by the insurance provider.

There are many insurance providers and policies available. We strongly recommend that you check with your insurance company to verify the extent of your coverage.
